# KGS Whetstones

KGS Diamond whetstones for very sharp sharpening fast sharpening of hard, brittle materials. No need for conventional sharpening stones any more. Diamond sharpening stones work much faster, keeping an aggressive cut, maintaining an incredible long life.

The KGS Whetstone is a precision diamond sharpening tool. The whetstone has metal bonded diamond for high strength. The aluminium support plate has plastic nubs on the back, preventing the slipping of the whetstone during sharpening. The precision diamond tools is well suited for sharpening or deburring any hard, brittle materials.

Ideal for precision faceting and sharpening of chisels, blades, knives, ice-skates, for all kind of tools with dull surface to reveal the sharpe edge.

## PATTERNS

KGS Diamond whetstones are available in Telum® and Flexis® pattern.

### KGS Telum®

Premium strong interlocking arrow pattern for precision grinding and polishing similar to conventional rigid diamond tools, with an even greater performance and very long life.

### KGS Flexis®

Professional standard dot pattern range of highly flexible tools with a high temperature resistance due to superior heat dissipation, open dot pattern reduces loading.

## BENEFITS

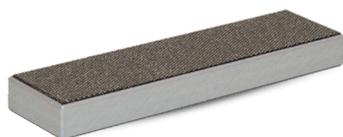

- No need for conventional whetstones any more, KGS Diamond whetstones work much faster and have an incredible long life
- Very well suited diamond stone for sharpening tools, deburring, and defect removal
- Manually controlled sharpening: make the surface extremely sharp!
- The aluminum support plate has plastic nubs on the back, preventing the slipping of whetstone during sharpening.
- Available in 3 different sizes and 4 different grades

## APPLICATIONS

- Sharpening chisels, blades, drills, knives, cutting tools, ice-skates, stone faceting.
- Choose from grits from extra coarse to very fine. Grades like 400 and 800 grit tend to finish finer. Grades like 120 and 200 tend to cut more aggressively.
- The sharp cutting diamond mineral tackles dull surfaces, and the lightweight hand-held design 100x25mm makes it easy to access contours and edges on the cutting tool. Also very convenient for faceting stone and tile edges.

## AVAILABLE DIMENSIONS

100x25, 150x50 and 200x75 mm

100x25 mm

150x50 mm

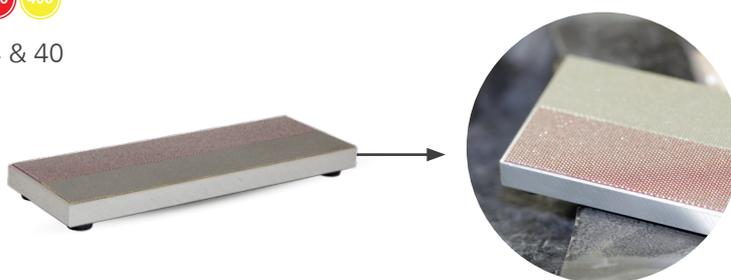

200x75 mm

## AVAILABLE GRIT SIZES

Colour	Black	Red	Yellow	White	Red & Yellow*
Grit	120	200	400	800	200 400
Micron	125	74	40	20	74 & 40

\* Combination of 2 grits, the coarse grit 200 and the finer grit 400. Perfect for grinding and polishing your tools.
